DESIGNS

COMPARISON IMAGES

**EAGLE
QUARTER.**

LOCHAILORT

Anderson Terzić Partnership

Introduction

We have produced photomontage images accurately showing the position and appearance of the proposed Eagle Quarter development viewed from locations in and around Newbury. The development is a replacement of the Kennet Centre shopping centre in the middle of Newbury.

These proposals have been submitted as planning application no.21/00379/FULMAJ to West Berkshire Council. It was validated on 15/04/2021, and is currently been considered. Following feedback from the consultation process, our clients, Lochailort Newbury, have decided to amend the design.

This document contains comparison images of the original and amended designs.

We have been asked to provide these three images for each camera location:

1. EXISTING

This is the photograph of the existing scene.

2. AS SUBMITTED (APRIL 2021)

This shows the design as submitted in the planning application. The design consists of several blocks of varying shape and height, the highest being Block A which is eleven storeys and Block B which is ten storeys.

Some images only show the outline shape of the buildings. This is shown as a blue line.

3. AS REVISED (AUGUST 2021)

The scheme remains predominantly identical to that submitted, but the main change which is relevant to these images is a reduction in height of the tallest blocks. Block A is reduced to nine storeys high and Block B also becomes nine storeys.

Some images only show the outline shape of the buildings. This is shown as a red line. The submitted design is superimposed as a blue outline to easily compare the two designs. Additionally we have shown the outline of the existing Kennet Centre as a yellow line to provide a comparison with the height of the existing buildings which will be demolished..

As before, the computer model of the proposals was provided to us by Collado Collins Architects.

Notes to View 18

BT Building and former Post Office

Cumulative effect of potential future development

Our clients, Lochailort Newbury, have identified the west end of the Royal Mail car park, with frontage to Cheap Street, as a likely redevelopment site and asked us to show the cumulative effect of such a development. We have shown a notional building 7m high to be indicative of a two storey building.
